PROFESSIONAL SUMMARY

Health Science senior with hands-on EMT experience, active phlebotomy training, and campus leadership as club president. Brings a strong academic record (3.813 GPA, President's List), coursework in health informatics and biostatistics, and a background that bridges clinical care with technology – including six independently designed and shipped health, research and real-time software products. Calm, dependable, and effective in fast-paced, people-focused environments.

EXPERIENCE

Emergency Medical Technician

Certified

Pre-hospital emergency care

Delivered direct patient care in fast-paced settings, performing patient assessment, vital signs monitoring, safe transport support and clinical documentation.

Communicated with patients and team members under pressure, adhering to established clinical and safety protocols in time-sensitive situations.

President

2026 – Present

California State University Channel Islands Esports Club

Direct club operations including officer coordination, meeting facilitation, event planning and competitive scheduling.

Represent the organisation to students and campus partners, fostering an inclusive community for members across experience levels.

Recruit players, organise events and lead competitive teams across multiple titles.

Previously Vice President (Fall 2025 – Spring 2026), and Vice President of the Santa Barbara City College Esports Club – a track record in collegiate leadership and team coordination.

Keyholder / Store Associate

Summer 2025

Goodwill

Operated the store independently as on-duty keyholder, managing customer service, sales-floor coverage, recovery and daily priorities.

Resolved customer questions and unexpected operational issues with minimal supervision, applying sound judgment and accountability.

EDUCATION

Bachelor of Science, Health Science

Expected Dec 2026

California State University Channel Islands

GPA 3.813. President's List, Spring 2026. Dean's List, Fall 2025. Semester Honors, May 2026.

Relevant coursework: Public Health, Health Care Informatics, Health Science Research Methods, Biostatistics, Medical Terminology, Bioethics.

Associate of Arts, Mathematics & Science

Graduated

Santa Barbara City College — Mathematics emphasis

Computer Engineering coursework

Prior

San Diego State University

AP Computer Science A awarded three units as COMP 105, Introduction to Programming, at CSUCI.

CERTIFICATIONS

Emergency Medical Technician (EMT) – Certified.

Phlebotomy Technician – In progress (2026). Initial coursework completed July 2026; preparing for the NHA Certified Phlebotomy Technician examination, alongside the California CDPH Laboratory Field Services CPT1/CPT2 licensing pathway.

RESEARCH

Alzheimer's disease & dementia education

105 participants

Collaborative student research · Health Science Research Methods, CSUCI

Contributed to a team study measuring whether a short, structured educational intervention changes participants' confidence around recognising, discussing and supporting Alzheimer's disease and dementia.

Confidence was measured before and after the intervention across a sample of 105 participants; the post-intervention measure improved.

Reported at the size the design supports: a convenience sample without a control group demonstrates that a short intervention can move self-reported confidence, not a population-level effect.

TECHNICAL PROJECTS

Six independently designed, built and shipped products. Full case studies at cvree.github.io/Portfolio-Hub.

Health Journal

Live

Local-first daily health record · React, Vite, installable PWA

A private health journal that runs entirely on-device with no account and no server, and makes no network requests at all once loaded.

User-designed check-ins, a day timeline, sunlight sessions computed from real solar elevation, personal experiments and lab results with laboratory-supplied reference ranges preserved.

Findings are gated behind a four-rung evidence ladder measured in paired days; the app reports no confidence percentages, on the grounds that a percentage is a claim about a population.

Exports to CSV, multi-sheet Excel and JSON, plus a printable appointment pack ordered the way a consultation runs. Optional encrypted sync derives its key at 600,000 PBKDF2-SHA256 iterations, on-device.

Phlebotomy Exam Prep

Live

NHA CPT certification study platform · Next.js, TypeScript, static export

Authored 513 original certification-style questions across ten study areas and 181 original vocabulary definitions, with explanations that name why the specific distractor chosen was wrong.

Built four Order of Draw drill modes over the six CLSI collection positions and a four-direction tube-and-additive drill, each fully keyboard-operable.

Deterministic, explainable weak-area detection, per-area mastery and a study readiness score that states in plain language what it does and does not predict.

257 automated tests, including structural assertions on the question bank so a content error fails CI rather than reaching a student.

OWCS Comp Tracker

Live

Computer-vision evidence pipeline · Python, OpenCV, SQLite, static site

Turns an esports broadcast VOD into an auditable hero-composition timeline: computational HUD calibration, gameplay-versus-replay frame classification, ranked template matching and a temporal swap model.

Detection returns *UNKNOWN* rather than a best guess; templates are promoted only after held-out validation, and hero readiness is reported as four separate measures rather than one number.

Human review gate where every detection is shown beside the frame it was read from, including the change points the model rejected and why. 107 offline Python test modules.

PaperAnimator

Live

Research-presentation editor · React 19, TypeScript, WebCodecs, pdf.js

Turns a research paper into a cited animated presentation entirely in the browser, with nothing uploaded and no account.

A marked passage carries the character-level quads of its source, so provenance is the selection itself and cannot be attached – or skipped – later. Every atom carries one of six provenance labels.

One pure render function drives the live canvas, the previews and the exporter, making preview-equals-export a type signature. Exports to MP4, PPTX, searchable PDF, PNG, SRT/VTT and timed transcript.

Manifester

Live

Guided-audio session builder · React, Vite, PWA, Web Audio

Loops a user's own written lines over layered ambient sound with two device-independent studio voices, cached per line so a heard loop plays fully offline.

Background sound, voice, speed and pitch all change live under a running session without restarting speech, clock or breathing guide.

Exports a real MP3 rendered on-device in a Web Worker, with a WAV fallback and no upload.

SpellBomb

In development

Real-time multiplayer game · Node.js, Socket.IO, Postgres, Discord Activity

Authoritative-server architecture: rounds, timers, grading, placement and every reward are decided server-side; clients send intent only.

Two game modes over one room system, with reconnects, spectators, a shared economy and a leaderboard, plus a Discord Activity that reuses the same client, protocol and rooms.

Documented threat model, including a known information-disclosure limitation and the gating that keeps it out of the competitive ladder.

SKILLS

Clinical & healthcare

Patient assessment · Vital signs monitoring · Clinical documentation · Patient communication · Medical terminology · Venipuncture and specimen handling (in training) · Order of draw · Safety and compliance protocols

Technical

TypeScript & JavaScript · React · Node.js · Python · SQL / SQLite · OpenCV · HTML & CSS · Git · Automated testing · Accessibility (WCAG, keyboard, reduced motion) · Introduction to Programming (COMP 105) · Computer engineering coursework

Health informatics & data

Health Care Informatics · Biostatistics · Health Science Research Methods · Survey design and pre/post measurement · Data export and reporting (CSV, Excel, JSON) · Reference-range-aware laboratory data

Professional

Leadership · Team coordination · Event planning and scheduling · Recruitment · Independent responsibility · Organisation · Calm decision-making · Customer service · Technical writing and documentation

References available on request. Every project claim above is described from the repository, its test suite and its running build; full case studies, including known limitations, are published at cvree.github.io/Portfolio-Hub.
